SUMMARY

I am a person who is very interested in the world of technology. For I worked as a Software Engineer, especially a Android Developer, I was responsible for developing applications for the company. There are several applications that have been uploaded on Google Play store and also have many benefits for many people. Besides that, I am a person who really likes to learn new things that I don't know yet. With that, I hope to become a person who has many benefts for many people.
